

ROBUSTNESS

Great load resistance : designed to receive daily the heaviest carcasses, load up to 200 kg.

- Welded whole construction.
- Legs and high level belt in stainless steel: legs 35 x 35 mm with cross reinforcement bars and high level belt 60 x 30 mm.
- High density polyethylene plate HD 500, thickness 25 mm, white.
(Others colours available on request).

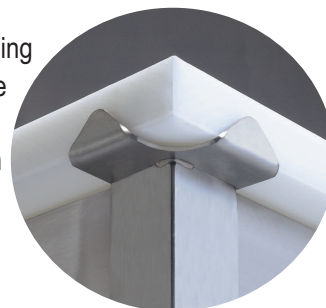

ERGONOMY

Tables easily adaptables thanks to their conception and proposed options :

- Tables height 900 mm with adjustment jacks and non-slip rubber pads.
- The tables can be supplied with 4 wheels diameter 125 mm, including 2 with brakes, to ease the cleaning of the room at the end of the day.

Easy gripping of the plate because larger than the frame by 25 mm.

HYGIENE

No corners thanks to the conception, choice of materials and manufacturing process:

- smooth surfaces without asperities nor nooks
- legs with jacks with no visible thread.
- removable top and accessories
- "NF Hygiène Alimentaire" certificate
