

A COMPLETE RANGE

For storage, preserving, transport and presentation of food.

- Wide range from GN 2/1 to GN 1/6
- Depths from 65 to 200 mm
- Conforming to european standard **EN 631.1**.

SOLIDITY

- Strong thickness
- Great resilience
- Temperature upholding from - 40°C to + 99°C is appropriate for congelation and temperature upholding (cold link-hot link).

POLYCARBONATE ADVANTAGES

- Completely recyclable
- No mark in case of shocks
- Contact quieter than stainless steel and less perception of the heat or the cold when holding.

PRACTICAL

- Transparents : good visibility of the contents.
- Graduated pans with capacity marks
- Easy gripping of the lid thanks to the moulded handle.
- Easy manual cleaning as in dishwasher
- Stackable pans without risk of wedging thanks to the shouldering and the smooth surface of polycarbonate.
