

TROLLEYS FOR CLEARING AWAY

EASY

Gastronorm trays

The dimensions of the small model's shelves (800 x 530 mm) allow GN pans to be placed perfectly flat, optimising the use of space.

Trays with raised edges

The raised edges on all four sides prevent items from falling off the trolley. This is further reinforced on trolleys with a gallery, which is positioned at all levels on all four sides. The shelves also feature a flattened edge at the bottom to prevent injury and a soundproofing plate.

Arched backrest

The hoop is set back to protect walls and doors: it cannot cause marks. The trolleys are available as standard with two hoops (very easy to grip) or a single hoop, which allows loads exceeding the dimensions of the platform to be placed on them.

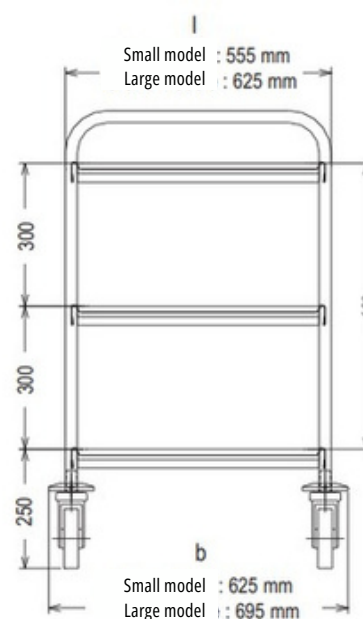

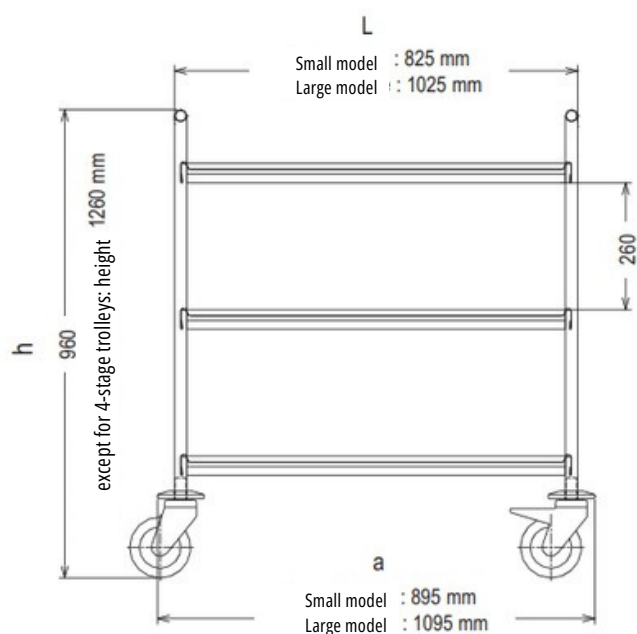

THE ROBUSTNESS

- The trolleys are made of stainless steel for food use, ensuring robustness and good corrosion resistance, and therefore a very long service life. Load capacity up to 50 kg per step.
- The shelves are welded on an automatic feed bench. The welds are made along the entire height of the shelf without any additional metal. This manufacturing process ensures perfectly even welds and exceptional strength.
- The trolleys are equipped with four Ø 125 mm polyamide swivel castors, two of which have brakes, with ring bumpers. Two castors have brakes to immobilise the trolleys. The wheel tyres and protective bumpers are non-marking.

Also available: two-hoop trolley units delivered flat-packed in cardboard boxes to minimise transport and storage costs. Assembly is by screws to a pre-set height.

Accessories can be hooked onto all models: cutlery tray, waste bin, bin bag holder.

TROLLEYS FOR CLEARING AWAY

Construction

- Welded stainless steel.
- Trolleys with gallery: stainless steel wire 50 mm high on all 4 sides.

Trays

- Stamped, 10/10 mm thick, with a 40 mm high rim.
- With flattened edges on the lower part.
- Soundproofed with a plate (rubber backing).

Arches

- Tube Ø 25 mm.

Wheels

- 4 swivel castors Ø 125 mm, polyamide, 2 with brakes.
- Non-marking rubber tyres.
- Ring-shaped bumpers.
