

Unit features:

- Stainless steel construction. Depth 840 mm + rail 322 mm, height 900 mm
- Stainless steel top, 20/10 mm thick, with orbital brushing, rounded front edge, straight rear edge.
- Cable duct behind the front panel allowing power cables to run along the entire length of the self-service line.
- Tray rail with 4 stainless steel tubes, 3 of which provide support and 1 for guiding the trays on composite brackets. Height 790 mm (in accordance with the decree of 31 May 1994, for people with reduced mobility).
- Electronic thermostat with touchscreen. Programming of the start time in delayed mode for up to three services per day. Stop time can be programmed for up to three services per day. Display of temperature, programmed start and stop times for each zone of the unit. Automatic management of summer/winter time changeover. Connectivity, easy data retrieval (temperature, operating time, consumption) via a USB stick as standard or via optional Wi-Fi.

Control panel

- **Connectivity:** easy data retrieval via USB stick or Wi-Fi.
- **User-friendliness:** touchscreen – intuitive operation.
- **Easy programming of multiple start and stop times.**
- **Energy savings thanks to start-time programming.**

SELF-SERVICE DISPLAY UNITS & SORTING CABINETS

2024–2026 Collection

Front panelling supplied: included in the price and in the unit code. Made from 16 mm thick double-sided water-resistant melamine-faced panels (CTBH) with veneered edges.

Side cladding at extra cost: made from double-sided water-resistant melamine (CTBH balanced) 16 mm thick with stainless steel protective corner profiles or stainless steel panels.

The cladding is available in a choice of 15 colours from Egger's Eurodekor 2024–2026 collection below.

Please contact us regarding other available colours, lead times and prices.

Exclusive benefits just for you...

+ Installers

- **Cable routing:** A cable duct running the full length of the unit, concealed by the front panels
- **Easy access for fitters:** Units can be connected to one another.
- **Easy installation of the railing:** Tubes secured to brackets by clamping. Eliminates the main fitting constraints.
- **Modular units:** Option to add or move a socket without modifying the unit
- **Standard evaporator pans on all refrigerated units:** Eliminates the need for a waste water connection.

+ Users

- **Longtime certification:** Our self-service units meet the requirements of Longtime certification (robust, durable and repairable).
- **Aesthetics:** Consistent design throughout. All display cabinets are cubic in shape. The display unit splashbacks are made of laminated glass. The display units are identical for both hot and cold units.
- **Practicality:** Sliding doors on display cabinets from a length of 1350 mm.
- **Improved visibility:** All side panes and sliding doors on display cabinets are double-glazed, reducing the risk of condensation.
- **Safety:** The display cabinet glass is fixed to the crossbars, ensuring stability whilst allowing for easy cleaning.
