The built-in modules

TOURNUS
EQUIPEMENT

Tournus Equipement supports project owners, architects and design offices in the implementation of their projects according to the layout concept, the number of meals, the layout of the premises and the planned organisation of the service.

For your restaurant, built-in modules **ideco** can be integrated into any design :

Online self-service, scramble, islands, kiosks, food court, sandwich bar, depending on the customer's desired focus (show cooking, quick cooking, world cuisine, themed meals, fast food, healthy cuisine). Your project is unique.

Our expertise: transforming a need, expressed by the chef and designer, into a convivial dining and relaxation space by playing with materials, colours, styles and equipment.

Freedom of design

The modules **ideco** can be incorporated into any layout: in line, scrambled, or in a shop. The elements **ideco** blend in with all styles of decor.

Highly robust

The modules **ideco** are establishing themselves as reliable and durable equipment, with a 20/10 thick stainless steel top and a design that prioritises quality of materials.

Simplified installation

The modules are quickly installed and can be interchanged. The modules **ideco** allow for standardisation of cut-outs: recesses are simplified.

Food safety

Ventilated display cases and refrigerated tanks ensure optimised temperature control. Tanks radiate heat in all directions. Electronic thermostat with touch screen.

Perfect connection between the shelf and the display stand uprights: easy to clean for impeccable hygiene.

Our achievements!

Built-in modules

Our standard technical modules without bases are designed to be integrated into customised units of all shapes and sizes designed by interior designers.

Our technical data sheets define the reservations and cutting dimensions.

- Food-grade stainless steel construction.
- Depth 730 mm (except for 3-tier refrigerated display cases, depth 800 mm).
- Matt stainless steel top, thickness 20/10 mm, with orbital brushing.
- Radius corners on all sides.
- Electronic thermostat with touch screen.
- Three types of display cases: 3-tier, distribution and presentation.
- Refrigerated modules: R455A refrigerant gas.

ideco

The display stands

- Single-level displays
- 320 mm deep shelf in 6 mm thick tempered glass with 80 mm high bonded splash guard.
- Ø 38 mm columns with radiused base, in brushed Stainless steel tubing, with optional polished Stainless steel tubing.
